

## Titan Cloud Software

From environmental compliance and facilities maintenance, to advanced fuel analytics and wetstock management, Titan Cloud software does it all.

Our comprehensive cloud platform enables fuel retailers to work more efficiently and profitably, integrating with their existing equipment and the vendors they work with every day.

Titan Cloud was launched in 2012 and is trusted by nearly 1,000 customers large and small at more than 85,000 sites globally. Customers have reported an 80% reduction in environmental fines and remediation costs, 30% decrease in consolidated maintenance costs, and an average .5-2% increase in fuel sales per site.

Titan is based in the U.S. near Nashville, Tennessee and has offices, staff and partners worldwide.
