

ALUCOBOND®

3A Composites GmbH

Buyer's guide

Posted / Last update: 10-12-2014

3A Composites GmbH (ex division of Alcan) is the worldwide leading manufacturer of aluminium composite materials and foamed PVC sheets with main productions in Germany and Switzerland and more than 40 years experience.

Our products ALUCOBOND®, DIBOND® and FOREX® fit perfectly the requirements of the Corporate Identity applications standards, and contribute to establish corporate image and culture. We offer turnkey solutions and services:

- 3A Composites to be involved in the Concept& Design proposal
- Transfer of fabrication know-how and prototype production
- Support for specification & drawings and recommendation of trained signmakers
- Planning and execution of the Rollout Program

ALUCOBOND®, DIBOND® and FOREX® offer a long-term, ecological solution in accordance with the international regulations for canopy, fascia, totem, pylon, signage, convenience store fascia, shop fitting and car wash cladding. We are able to provide customized colours and coatings, individual decorated finishes and optimized painting systems solutions.

Corporate chains like BP, Caltex, Galp, Petron, Petronas, Shell, Repsol, Texaco, Total and others already trust our products. We serve also Mercedes Benz, Audi, Peugeot, Nissan, Porsche, Jaguar and others.

With 3A Composites: Enhancing your corporate image.
