

StocExpo 2013

Now in its ninth year, The Storage Terminal Operators' Conference & Exhibition (StocExpo) will take place from 19 - 21 March 2013 at Antwerp Expo, Belgium.

Each year the conference covers a variety of fundamental issues facing the industry and its numerous stakeholders. The programme is carefully designed and evaluated by leading figures in the industry ensuring presentations are up-to-date and constructive for those in attendance. Independent and major terminal operators, as well as manufacturers and suppliers, come together to redefine strategic vision and technical requirements for tomorrow's terminals.

StocExpo 2013 will once again provide a unique platform for the global tank storage industry to exchange best practice solutions, to review forecasts, to discuss how to make the most of opportunities and how to overcome challenges, as well as a review of commercial and business strategies to maximise commerciality, viability and efficiency within the tank storage sector. Delegates will also be able to take advantage of a number of networking opportunities in the concurrent exhibition, making the most of their attendance at the show.
