

Mobility Plaza®

Fueling Tomorrow 2024

The rules issued by the European Union set precise deadlines by which the goal of carbon neutrality must be achieved.

Mobility is therefore transforming and research is driving innovation in the fuel sector as well.

For several years now, BFW E has been closely following the evolution of the sector and organises events dedicated to hydrogen, methane and biomethane, LNG and bio-LNG, fossil and synthetic fuels, focusing on their use for mobility and industrial applications.

From this experience, **FUELING TOMORROW** is born: the event dedicated to the transformation of mobility, innovation in the fuels sector and the transformation of the distribution network.

At the heart of the new project will be the **Service Stations of the Future** and the **Green Gas area for industrial use**.

Special exhibition areas will host the most innovative technologies, products and services, as well as debates and conferences, enabling operators to get hands-on experience and information in a new experiential context.

See you **in Bologna from 9 to 11 October 2024!**
