

UNITI Mineral Oil Technology Congress 2019

Specialists of the lube and fuel sector as well as experts of the mechanical engineering and automotive industry meet again at the international congress UNITI Mineral Oil Technology Congress to discuss current trends and future developments in the industry.

The topics include the most recent industry trends of lubricants and fuels from research to practical applications. A get-together evening offers further possibilities for expert discussions.

With the strong presence of the auto industry, the congress is getting increasingly important. The congress provides an excellent platform for sharing expertise and offers a great networking opportunity on an international level. The open dialogue of the mineral oil and additives industry with other stakeholders e.g. automobile industry, is most valuable for all participants. Besides the presentations, this can regularly be seen in the follow-up discussions during communication breaks.

Furthermore, a professional exhibition (exclusively for participants) gives comprehensive information on new products and services.

The UNITI Mineral Oil Congress will be a good opportunity for participants to inform themselves quickly and easily about innovations, future demands and developments to push ahead both the personal and the company's success.

This pre-seminar "NESTE – Join Us on the Road to Sustainability" as well as the second pre-seminar "5. NYNAS Industrieschmierstoff-Forum 2019" are offered in the afternoon prior to the congress. Thus, participants may benefit even more from the information and ideas they acquire from attending the congress at no additional costs. Early registration at either the "NESTE – Join Us on the Road to

Sustainability” or the “5. NYNAS Industrieschmierstoff-Forum 2019” is highly recommended as the number of participants is limited and there are only a few places left.

UPDATE: We are now happy to inform you about the pre seminar **‘NESTE - Welcome to join us on the road towards improved sustainability’** which take place at the “Alte Reithalle” at the MARITIM Hotel on April 1, 2019.

This pre-seminar (lecture language: English) as well as the second pre-seminar ‘5. NYNAS Industrieschmierstoff-Forum 2019’(lecture language: German) are offered in the afternoon prior to the congress. Thus, participants may benefit even more from the information and ideas they acquire from attending the congress at no additional costs.

Early registration at either the ‘5. NYNAS Industrieschmierstoff-Forum 2019’ or the ‘NESTE – Join us on the road to sustainability’ is highly recommended as the number of participants is limited and there are only a few places left.
