

Petrol PLAZA

PetrolPlaza Scandinavian Special: Tatsuno Corporation in Scandinavia

From 1979 until today in 2016 NPS Service AB has been in its cooperation with Tatsuno Corporation in Sweden and the neighbor countries in Scandinavia, bringing Tatsuno's developed products.

In some history, it was introduced in 1979, together with Tatsuno Corporation, by the first credit card systems for the Swedish BP and UNO-X in Sweden.

In 1981 it was launched after negotiations in Japan with Tatsuno Corporation that the production of

electronic was done for gasoline and diesel fuel meters for the Swedish market. The production base was placed to Falkenberg in southern Sweden. The starting years it was mainly the conversion of existing mechanical meters where the mechanical counter was changed to ditto electronic retrofit device from Tatsuno. This meant that petrol companies had an updated by the modern electronic meter, with all its advantages, at greatly reduced prices.

In 1984 the first new meter was delivered with its own engineered design, equipped with hydraulics and electronics of Tatsuno. Until 2000, app.2 600 meters were delivered to Sweden, Denmark, Poland, and Lithuania from Japan.

NPS Service AB has since then continued to be the dealer for Tatsuno's products and delivered to a large number of very satisfied customers.

Besides, NPS Service AB has been producing CNG / Biogas dispensers in Tatsuno's Cabinet and with Tatsuno's electronic, and delivered and installed throughout Scandinavia.

Tatsuno's products will from now on get a stronger position when market side of NPS is enhanced with a dedicated resource for the Swedish and Scandinavian market.
