

Mobility Plaza®

Improve the user experience with MAGPay 43 for your payments!

MADIC Italia launches the MAGPay 43, an all-in-one PCI 5.x device for indoor & outdoor where unattended payment is the rule.

The innovation of the MAGPay 43 focuses on a **new architecture** based on the Core MC-1 (Madic Core One) chip. Ultra-powerful, this very new technology allows a **maximum security** while the **flexibility of adaptation** to respond to the different businesses without jeopardizing its certifications.

Compact and ruggedized, the MAGPay 43 fits into vending machines, ticketing, parking terminals and EV chargers. Thus, a retailer can use MAGPay 43 for its different activities with a **long-life component** and **without being OS-dependent**.

The MAGPay 43 is the first terminal of the new range by MADIC Italia. It is equipped with a **hi-bright 4.3" touch screen** that allows **PIN on Glass** associated with an integrated **contactless reader** as well as a **smart card and magnetic stripe reader**.

It is the perfect companion for self-service where **very low power consumption** is required.

While our brand-new website is under construction, please call us or send a direct contact request - see the contact details on the right.
