

Russia: Tatneft opens new fuel station in Republic of Tatarstan

Tatneft's latest addition in Almet'yevsk is the company's fourth filling station operating in a new format.

Tatneft-AZS Center rolled out after reconstruction is third filling station in Almet'yevsk, Republic of Tatarstan, Russia. This is the fourth Tatneft filling station operating in its new format.

Tatneft new fuel station can perform 500 filling operations per day. TANECO AI-92, 95 and 100 gasoline grades, as well as diesel fuel brands of the same TANECO production are sold at the 10-sleeve GILBARCO fuel dispensers (TRK). Motorists can drive up to the dispenser, regardless of the fuel tank location, and refuel the car from any side.

Electric gas owners can also use this filling station as the facility is equipped with a multi-standard fast charging station that allows 30 to 80 percent charging of the batteries within 15 minutes.

The complex also includes a robotic-aided washing facility. In addition, the site's parking zone

capacity has been significantly increased.

Customers can also get access to convenience store services and products.

“We hope that the customers will catch fancy to the new filling station, because they themselves have chosen the station’s design. At our filling stations, we sell not only the best fuel from the manufacturer, but always try to maintain a high level of service as well,” said Deputy Director of OOO Tatneft-AZS Center, Maxim Komarov.
