Shell Victoire, New Caledonia: From simulation to installation

Pacific Energy recently built the new Shell Victoire site in Nouméa, New Caledonia in the southwest Pacific Ocean. Bever Innovations supplied the lighting solution.

The new canopy has a smart and futuristic design. Click through the images in the carousel to see it:

Bever Innovations supplied 18 Ambiente XL EOS2 luminaires. The LED fixtures are installed on the canopy columns for a stunning illumination effect.

Ambiente XL EOS2 LED Luminaire

Thanks to Bever Innovations EOS technology, three wireless motion sensors detect traffic on site and control the luminaires in order to reduce the electrical consumption whilst ensuring safety and comfort for the users of site.

Pacific Energy partnered with Bever Innovations based upon the provision of technical support in the design of the illumination plan (Dialux light studies) and the management of the logistics to New Caledonia.

Bever Innovations supplies all over the world. Would you like to get in touch and get more information?

Please contact our employees here. Our Bever Innovations team consists of people with an excellent knowledge of our products. We create exactly the right lighting solution for your station together with you.
