ENOC Group opens two new compact stations in Al Ain

The new openings bring the total compact station network of the company to nine locations across the United Arab Emirates.

ENOC Group has launched two of its newest compact stations in Al Ain, bringing the total number of outlets operating in the Emirate of Abu Dhabi to four.

The company currently has nine compact stations operating across the United Arab Emirates. While the site on Sweihan Road is strategically located within the community, the facility in Al Khaznah will service vehicles driving towards Al Rimah.

"The opening of our newest compact stations in Al Ain demonstrates our dedication to offering fuelling choices to meet the UAE's energy demands and aligns with our broader expansion plan to provide motorists across the country with convenient refueling solutions," said Saif Humaid Al Falasi, Group CEO at ENOC.

With a capacity of 45,000 LTR and an area of 4,000 m² each, both new stations are equipped with two dispensers, allowing for fuelling on both sides of the site. In addition to auto tank gauging and electronic leak detection, the stations feature a Vapour Recovery System – a process that enables the recovery of 70% gasoline vapor emissions.

To improve safety precautions, both facilities feature an audible alarm, an overfill prevention valve, pressure vacuum vents and emergency vents for both the inner and exterior walls.
