

GENOL G+ Card App powered by Hectronic

Discover the future of refueling with the GENOL G+ Card App by Hectronic! With over 270 Lagerhaus GENOL filling stations throughout Austria and over 70 BayWa filling stations in Germany, GENOL offers a dense network of refueling options - especially in rural areas.

The technical implementation of the app was carried out using our easy2fuel mobile payment platform. The platform enables the authorization of refueling transactions with a smartphone directly at the fuel pump. Fuel cards can thus be easily digitized - of course, the functions and design can be adapted to your wishes. In addition to conventional fuels, refueling with alternative fuels and windscreen cleaning can also be paid for with the GENOL app.

The advantages for fuel customers also speak for themselves:

- Integrated location finder for the nearest petrol station
- Navigation directly to the petrol pump
- Contactless payment

- No more misplaced, dirty or defective fuel cards

As you can see, our **easy2fuel mobile payment platform** benefits operators and customers alike. Future-oriented, flexible and easy to implement.

Try it out and download the app now from the **App Store** or **Play Store**.
