

DOUBLE WALL TERMINATION FITTINGS NOW AVAILABLE

New UPP™ brand double wall termination fittings make terminating secondary contained pipework simple by combining all pipework and fitting components into a single piece. Scraping and welding operations are drastically reduced making installation faster and easier.

HIGHLIGHTS

- Comes complete as a single piece combining both the double wall pipe and the termination fitting.
- Ideal for terminating double wall offset fill lines, vent lines and applications where double wall containment to grade level is required.
- Each fitting is specifically designed for the fastest, most efficient installation by reducing the amount of necessary cleans, scrapes, welds, and parts.

- The simple, yet rugged one-piece design withstands the harsh environment of a petrol station forecourt.
- Fast integrity testing accessible at grade level through optional integrated test port.
- Available in a variety of diameters including 63x50 mm, 75x63 mm, 110x90 mm, and 125x110 mm as well as both male and female options.

All double wall termination fittings are available to order immediately.
