# ULTIMATE CONTROL FOR GAS STATIONS NSX

NSX: The most reliable and secure system!

The new back-office system NSX offers complete gas station operation control; its reliable architecture enables a wireless communication (433MHz) with the pumps/dispensers through its unique CDG centralizer, so you can finally have all the control you always wish, just a fingertip away.

With the NSX your gas station will be prepared for all the future requirements and needs of your customers. Due to its open web services and shared data bases the NSX system can be easily used to centralize the operation of your gas station network and can also be accessed by new apps and developments for a seamless integration.

STATE OF THE ART IN TECHNOLOGY FOR GAS STATION

Easy to Use:

- Access by users and roles to different functions of the systems

- Access by modules to different operation modes

Accurate Reporting:

- Statistical reports of transactions by filling position or even by hose, for an easier track of the last hour's sales or for specific dates & hours
- With its flexible filtering and intelligent searches, finding earlier transactions is just a matter of seconds, and you´ll be ale to print a receipt again in case of loss
- Real time visualization of the pumps/dispenser status and sales, so you always have control of all forecourt issues

Smart Recovery:

- Automatic recovery of stand-alone mode sales
- Manual recovery of cash transactions done to fleet customers

Management and Merchandising:

- Self-Service and Full-Service operations modes
- Fleet management with vehicle and account restriction of consumption by money, volume, visits and products
- Shifts management, manually or programed, with the possibility of having up to 6 different scheduled shifts, 7 days a week
- Attendees management with the sales control of them
- Shifts between attendees can also be controlled and managed
- Price changing and programming with a wide range of possibilities (for example for Happy-hour and other marketing purposes)
- Multiple price levels option for local accounts, fleet discrimination, filling positions or special days and hours
- Instant sales balances and snapshot reports to compare performance of the sales team.
- In-pump ticket printing, with personalized legends and logos and with all the fleet customer information

Operation Module:

- Have the forecourt operation in your screen in real-time
- Quick statistical reports by filing position in which you can see the performance of your sales team
- On screen visualization of the latest hours sales of the gas station with multiple filter criteria
- Self-service authorization module
- Quick and summarized information of sales
- Quick tool-search to find specific transactions and get them printed again.

Management Module:

- In this module you will be able to manage all the local fleets and its restrictions & modifications
- Configure all the business rules of your gas station
- Have a deeper control over pumps and attendees
- Manage shifts and its schedule
- Manual and schedule price changing
- Sales team and administration

Supervisor Module:

- Validate internal system messages of events
- Quick check for specific vehicles and its account conditions
