

## Progressive Down Light 3

### LED lighting system for fuel canopies

Progressive Down Light 3 for petroleum canopies is a universal 1-for-1 upgrade of existing canopy lights. This luminaire continues to set new standards with its revolutionary design, optimized radiation pattern, and slim profile.

- Directs light to the dispensers with a smooth transition away from the canopy
- Installs with one person and does not require site surveys
- Saves up to 84% energy compared with typical HID fixtures
- California Title 24 compliant (with dimming control)

#### Cover plate

Mounts directly to or hides the footprint of the previous HID fixture, eliminating the need to touch-up, paint, or install custom trims.

#### Progressive reflector

Focuses light on task areas while softly illuminating peripheral area for increased safety and security.
