

OMNI SERIES™ VAPOUR RECOVERY DISPENSING SYSTEM LAUNCHED

Franklin Fueling Systems announces the launch of the Omni Series™ Vapour Recovery Dispensing System, a new European-style hanging hardware system ideal for European and Asian markets requiring an ATEX certified system.

THE SYSTEM INCLUDES

- A complete line of vapour recovery nozzles with highly customizable options.
- An assortment of vapour recovery break away valves and sight glasses.
- A line of totally customizable vapour recovery hoses.

The Omni Series™ nozzle features a revolutionary modular interior design, with a pre-assembled cartridge containing all inner components that makes servicing faster and easier than ever. Servicing a nozzle is now as simple as unloading a single cartridge and replacing it with a new one, meaning that nozzles spend less time being serviced and more time in service.

Every Omni Series™ nozzle comes with several standard key safety features that prevent accidental fuel spills, keep customers safe and forecourts clean.

- No Pressure - No Flow prevents the nozzle from dispensing fuel if the nozzle doesn't detect pressure from the dispenser,
- Over-Horizontal Automatic Shutoff safeguards against unintentional fuel spillage if the nozzle is tilted past horizontal,
- Full Tank Shutoff Port automatically stops the flow of fuel once a vehicle's tank is full.

The Omni Series™ features highly customisable options that provide full compatibility with an assortment of dispenser models.

- Seven different hand guard and hand guard magnet options,
- Eleven different scuff guard colour options,
- Growing library of standard nozzle badge options,
- Custom nozzle badges available,
- Open Vapour Path model for single-nozzle dispensers,
- ON/OFF Vapour Path model for multiple-nozzle dispensers,
- 21mm vapour recovery hose available in custom length options.

All system components are available to order immediately. Contact your local Franklin Fueling Systems sales manager for pricing and availability. Visit [franklinfueling.com/omni](https://www.franklinfueling.com/omni) to learn more about the new Omni Series™ vapour recovery nozzle and all of its features.
