## The new technology from TOTAL -Turkey "YAKITMATİK"

Turpak has been leading the technology development in vehicle identification systems with many innovative products, offering a wide range of retail fleet solutions in Turkey.

This is strongly backed by its sustained leadership in the retail automation solutions and service network over the last 16 years.

- Turpak technologies are used in more than 1.5 million vehicles, which serves in 81 provinces of Turkey, over 40,000 companies in Turkey.
- Over 30,000 vehicle installations are carried out per month with the experienced and certified field service teams as at the usual Turpak quality in accordance with the fleet customer's demands and needs.

**Total Oil A.S** in Turkey has decided to start to use the new generation of Turpak Nano technologies that have the highest standards and properties for subsequent **TOTAL YAKITMATİK** assemblies.

Turpak that produces innovative technologies every day with a new generation of equipments by providing faster and full wireless, safer installation advantage. In addition, the new small design is not only minimizing the installation time but also it has a removable protection for security which aims to keep customer 's satisfaction at the highest level.
