

PetrolPlaza on the road 2015, coverage of all major industry events

Since 2010 PetrolPlaza has provided coverage of the major events in the petrol retailing, fuel logistics and car wash industries.

Through the exhibitors galleries, provided prior to the shows and video reports PetrolPlaza's users can get to know all the latest groundbreaking technologies, hear from key industry players through interviews, and acquire a complete insight into the events which have such a fundamental influence in the market.

This year we have already reported about the NACS Insight Summit Europe 2015, which took place in June in London and Berlin. Find the video review [here](#).

On 29-30 September we will attend the PetroForum MENA in Oman, the premier event for the petroleum retail and convenience market for The Middle East, North Africa and Turkey. For more information take a look at the [PetroForum MENA event profile](#).

Our next event will be the NACS PEI in Las Vegas, which will be held October 11-14. The PetrolPlaza [PEI NACS Show 2015 Exhibitors gallery](#) is already available. "With this gallery we provide professionals with an overview of the exhibitors and a preview to the upcoming highlights, helping them prepare for their visit to the show," explains Bruno Boroewitsch, CEO of PetrolPlaza.

PetrolPlaza TV will be covering the [PEI convention](#) sponsored by one of the industry's leaders, Wayne Fueling Systems. "Wayne has a strong presence at the NACS Show this year displaying their two dispenser product lines the Wayne Ovation™ 2 fuel dispenser and the Wayne Helix™," said William Reichhold, Vice President, North America, Wayne Fueling Systems.

Wayne will be exhibiting a solution to one of this year's industry hot topics, the new North American EMV regulations. "Fuel retailers can learn more about how they can comply with new EMV regulations with Wayne EMV® Solutions," Reichhold added.

PetrolPlaza will also be covering the Moscow International Exhibition [AUTOCOMPLEX-2015](#), held on October 28-30. "Autocomplex exists for 22 years and enjoys an excellent reputation amongst decision makers from the retail petroleum business in Russia and the CIS countries," said Mikhail Tsuladze, general director of ACS-Expo, organiser of Autocomplex.

"The current difficult circumstances including falling oil prices, the decline in car sales and the

sanctions against Russia complicate the business development of many companies. Nevertheless many of them do face these challenges by attending Autocomplex to find new business opportunities and identify new prospects,” commented Tsuladze.

To close off 2015, we will be covering the [APEA Live 2015](#) in Coventry, UK, held on November 5. Rebecca Tompkins, Event Manager at APEA Live, spoke about this year’s APEA Live: “The best conference speaker line-up ever seen at the event, with high business relevance to forecourt owners. Keynote address will be held by former UK Secretary of State for Energy and Transport Lord Howell of Guildford. The hottest topics include mobile payments, retail development and hydrogen fuelling.”
