## Bulletin Mepsan September 2015

**MEPSAN JOINS TANAP,  
THE LARGEST  
ENERGY INVESTMENT**

Trans-Anatolian Natural Gas Pipeline (TANAP) project is intended to transfer Azerbaijan natural gas to Europe via Turkey. Started with the agreement signed on 26 June 2012, TANAP is considered the largest energy investment so far.

**TP PETROLEUM DISTRIBUTION (TPPD)  
VISITS MEPSAN**

Having been established in 2006 as an enterprise of Türkiye Petrolleri Anonim Ortaklığı, and naming ahead to become one of the pioneering players of fuel industry, TP Petroleum Distribution (TPPD) aims to work with a powerful supplier of station equipment that will support their ambitious growth objectives. Considering the rapidly increasing number of TP stations, the authorities of TP paid a visit to Mepsan manufacturing plant in Tuzla for projects that will ensure uninterrupted delivery of work.

**MEPSAN HAS BECOME THE GLOBAL SUPPLIER OF GULF**

Taking part in Gulf Oil International Global Network Conference organized in China from 7 to 11 September, Mepsan came together with all global representatives of Gulf and started new projects in accordance with mutual collaborations.

**BP's COMPRESSORS WILL BE SUPPLIED BY MEPSAN**

Mepsan won the tender for compressors floated by BP Turkey, one of the largest energy companies in the world, and started shipment of Indutec Type A Air Compressors.

**MEPSAN RAISES  
THE BAR IN  
AFTERSALES  
SERVICES WITH HSSE**

The authorized service points of Mepsan work with the consciousness of removing the risks that may ensure in hazardous circumstances on site and protecting the environment.

### Mepsan joins TANAP, the largest energy investment

Trans-Anatolian Natural Gas Pipeline (TANAP) project is intended to transfer Azerbaijan natural gas to Europe via Turkey. Started with the agreement signed on 26 June 2012, TANAP is considered the largest energy investment so far.

TANAP enters Turkey through Türkgözü on the border with Georgia, and runs to Europe through Eskişehir and Thrace-İpsala. With its land part in 2 sections that are 56 and 48 inches in diameter, sea

part that is 36 inches in diameter, and its total length of approximately 1.850 km, TANAP is the longest pipeline with the highest carrying capacity ever to be built in the world.

With mobile fuel containers and next-generation vehicle identification systems, refueling support of the project under which significant domestic and foreign companies in a leading position in engineering, purchasing, construction and manufacturing processes, will be conducted by Mepsan. Thanks to this system, refueling will be made with 10 Industex container type mobile fuel stations at 2 locations.

With the 'ID Chips' to be installed on about 400 vehicles that will serve under this project that ensures the energy safety of Europe, UHF technology will be used to track fuel online.

### **TP Petroleum Distribution (TPPD) visits Mepsan**

Having been established in 2006 as an enterprise of Türkiye Petrolleri Anonim Ortaklığı, and running ahead to become one of the pioneering players of fuel industry, TP Petroleum Distribution (TPPD) aims to work with a powerful supplier of station equipment that will support their ambitious growth objectives. Considering the rapidly increasing number of TP stations, the authorities of TP paid a visit to Mepsan manufacturing plant in Konya for projects that will ensure uninterrupted delivery of works.

TPPD has 315 fuel stations all over Turkey. Particularly the fact that Mepsan distinguishes itself from leading foreign companies as an equipment manufacturer with domestic capital, manufacturing higher-quality equipment with technological features and functions was an important factor in TPPD's visit to the manufacturing plant of Mepsan in Konya.

Manufacturing and After-Sales Service staff of Mepsan, which accompanied the authorities of TPPD during their Konya visit provided information about all production lines, technological equipment and manufacturing stages, capacities, After-Sales Service central building, and operations of their call center.

### **Mepsan has become the global supplier of Gulf**

Taking part in Gulf Oil International Global Network Conference organized in China from 7 to 11 September, Mepsan came together with all global representatives of Gulf and started new projects in accordance with mutual collaborations.

Having materialized complete station technologies in 300 stations of Gulf for the last 3 years, Mepsan will now take its achievement to all international markets where Gulf operates. Batuhan Kiroğlu, Sales and Marketing Director, and İbrahim Çevik, Middle East and Africa Sales Director of Mepsan took place in the conference that took place in China.

### **BP's compressors will be supplied by Mepsan**

Mepsan won the tender for compressors floated by BP Turkey, one of the largest energy companies in the world, and started shipment of Industex Type A Air Compressors.

A member of Industex product family that includes on-site and reliable equipment for both fuel stations and different manufacturing plants, Industex Type A Air Compressors stand out with their superior technical and mechanical design, reliability and trouble-free service for several years even in harshest operating conditions.

Industex Type A Air Compressor differentiates with its highly efficient belt and pulley mechanism offering easy maintenance, air cooling and silencing system providing a clean and silent working environment, compressor output valve with oil level gauge providing ease of service, featuring a handling lever for easy handling and a meticulously designed tank section, which is resistant to wear and corrosion with its electrostatic powder paint, and provides a long life cycle with rubber vibration dampers.

### **Mepsan raises the bar in aftersales services with HSSE**

The authorized service points of Mepsan work with the consciousness of removing the risks that may ensure in hazardous circumstances on site and protecting the environment.

In addition to technical trainings, Aftersales Services Department of Mepsan provides its authorized technical services with training on topics such as general work health and safety, the causes of occupational accidents and occupational diseases, risks during work, the principles of avoiding accidents, injuries and diseases and implementation of protection techniques, safe use of work equipment, legal rights and responsibilities of employees, information on the legislation, establishing a safe environment and systems at the work site, using personal protective equipment, working with equipment with display, warning signs, risks caused by chemical, physical and biological agents, cleanliness and order, fire protection, conditions of thermal comfort, ergonomics, electricity hazards, risks and measures, first aid and rescue.

In addition, the damages to the environment in hazardous situations such as accidents, spills and rollovers on site are prevented with spill kits imported from the United Kingdom, which are distributed to all regional service points.

Mepsan Aftersales Services Department aims to increase customer satisfaction by adopting a concept of service involving both a well-trained staff and with quality products.
