

The iX Pay™ Secure Payment Terminal for EMV®-Compliance

Wayne Fueling Systems Introduced the iX Pay™ Secure Payment Terminal for EMV®-Compliance at NACS Show 2015

- Wayne announces new iX Pay™ T5 and T7 secure payment terminals offering universal EMV®-compliant outdoor payment solutions.
- Wayne to display and demonstrate additional products including the Wayne Ovation™² and Helix™ fuel dispenser lines as well as the Wayne NAMOS™ point-of-sale (POS) system at the exhibition.
- PEI Convention at the NACS Show to feature Wayne panelist at “EMV on the Forecourt” session.

Wayne announced their new technology that will provide EMV-compliance for outdoor fueling dispensers at the National Association of Convenience Stores (NACS) Show from October 11-14, 2015, in Las Vegas, Nevada. The iX Pay T5 and T7 terminals are a one-size-fits-all retrofit kit which enables legacy fuel dispensers in the field, regardless of original equipment manufacturer, to be EMV-compliant using the highest security standards and latest technologies.

“We’re pleased to add the iX Pay T5 and T7 secure payment terminals and retrofit kits to Wayne’s EMV Solutions offering,” noted Wayne Chief Executive Officer, Neil Thomas. “This product has been engineered to make a retailer’s transition to EMV as easy and cost-effective as possible and provide features and benefits far beyond just meeting the latest EMV payment security compliance standards.”

The iX Pay T5 and T7 terminals are designed to meet the latest published security standards, are Underwriters Laboratory (UL) certified, and are adaptable to future payment changes. Features of this product include a large 7” Widescreen VGA display, a touchscreen user interface, media capabilities and a state-of-the-art secure keypad. The terminals also integrate seamlessly with the Wayne Fusion™ 6000 forecourt controller connecting to the NAMOS POS system.
