

New Diesel Exhaust Fluid (DEF)/AdBlue® solution from Franklin Fueling Systems

Franklin Fueling Systems are pleased to introduce their new complete system solution for DEF/AdBlue®.

This total system solution for DEF/AdBlue® includes the following components:

1. Recirculation System

Franklin Fueling Systems provides a state-of-the-art recirculation system as part of their TS-550 evo™ tank gauge that prevents DEF/AdBlue® from freezing in low temperatures without needing to heat the pipelines.

2. Submersible Pumping Kits

FE Petro™ brand DEF submersible turbine pump (STP) kits, powered by the legendary Franklin Electric motor, are built specifically for DEF applications with a host of application-specific features.

3. Hardware

All compatible hardware products are composed of DEF/AdBlue® compatible materials, including stainless steel and various elastomers.

4. Hanging Hardware

Franklin's FLEX-ING™ brand AdBlue®/DEF hanging hardware solution includes everything you need to safely dispense DEF and protect you and your customers from costly mis-fills.
