

SOCAR launches floating gas station in Ukraine

Azerbaijan state-owned energy firm SOCAR has rolled out a floating gas station in Kiev to welcome this year's navigation season.

According to Azernews, the floating gas station named "Baku-1", which can be found at Primatel Yacht Club on the Dnieper River, will provide fuel to yachts, cruisers, and boats.

Baku-1 is SOCAR's second floating gas station in Ukraine.

Last month, the bunker vessel "Ganja", located at Sauvignon Yacht Club in Odessa, resumed operations.

In total, SOCAR owns and operates 57 gas stations in Ukraine.

The energy firm also runs filling stations in Azerbaijan, Georgia, Romania, and Switzerland.
