

## Manaseer opens 4 new gas stations in Jordan

**Manaseer Oil & Gas recently opened four new fuel service stations in Jordan, adding to their growing network.**

Fuel retailer Manaseer Oil & Gas has announced the opening of four new gas stations in Al-Quds St., Wadi Saqra St., Al-Masharea and Dead Sea II.

“All the service stations are fitted out with HSE equipment, ensuring a safer and healthier environment for employees and customers as well as residents of the surrounding areas,” says the company. “The stations use a vapour recovery system that extracts fumes discharged from fuel tankers to protect the environment.”

The newly built sites bring Manaseer’s total number of gas stations to 53. The company has 10 more sites under construction and is hoping to open ten stations a year, as well as modernizing some of its current network.
