

Tank Testing Equipment with ATEX Certification

Purpora Engineering, Inc. is excited to announce the introduction of the Alert Tank Testing Equipment with ATEX certification to the European market.

The Alert equipment is the most comprehensive system offering both volumetric and non-volumetric testing capabilities. It has been in use throughout the world for almost 20 years.

Strengths:

- Largest Certified Test Range - Certified to EPA Specifications to 276,000 liters
- Easy to use Windows based application
- Ullage can utilize Pressure OR Vac
- Broadest Range of Liquids compatibility
- Compact anodized Aluminum Probe Sets keep you from carrying several different sizes
- No need for costly annual calibration of equipment
- View of live signal during test
- Water ingress detected during test even in Ethanol Blends

In addition, Purpora Engineering has partnered with HATT-Hazardous Area Technical Training in the UK to offer sales, training and customer support throughout Europe.
