

Balch Petroleum

Balch Petroleum is a company with over thirty years of experience as a general engineering contractor. We have cultivated close working relationships with major oil, public utilities, public works, and private companies based on our ability to get jobs done on time, and within budget. These factors along with our quality workmanship have resulted in acquiring 90% of our jobs from repeat customers satisfied with our performance.

Construction services: conception to design, permitting, demolition, shoring, excavation, fuel system installation/removal, vapor extraction/groundwater treatment system installation, backfill, compaction, grading and site restoration.
