

2nd WPC Leadership Conference

Through responsible actions and close cooperation with all stakeholders the oil and gas industry will be able to contribute to sustainable solutions. The World Petroleum Council will be bringing together industry leaders to discuss and demonstrate best available technology and practices in order to minimize impacts and risks to the people and environments where we operate around the world. By highlighting the industry's global strategies we can contribute to raising the standards across the sector.

The President of the World Petroleum Council, Mr. Tor Fjaeran, encourages all to participate: "Given the complexity and challenges that the petroleum business will face in delivering energy for sustainable development of the world, responsible culture needs to be incorporated at all levels, from the small communities where we operate and throughout our global business. Stable long-term relationships and cooperation with all stakeholders enables our industry to provide sustainable energy for all."

Now on its 2nd Edition, WPC Leadership Conference will be held at the Renaissance Hotel, Mumbai, India on the 18 - 20 of February 2019.
