

Integer Emissions Summit USA 2019

Integer Emissions Summit USA 2019 will be hosted in Indianapolis, Indiana. Over 130 senior executives will join us on **19-20 November**, to discuss the future of emissions control across North America, and develop their network of connections at North America's primary emissions-focused event.

With USA EPA (Environmental Protection Agency) joining the discussion initiated by California on future heavy-duty emissions reduction, there are many issues to debate, such as:

- How can the industry ensure it is prepared for the most advanced NOx reduction in the world?
- What are the best solutions to achieve this effectively?
- How can this be achieved alongside on-going GHG reductions?

Sectors the conference covers:

- Heavy-duty commercial vehicles
- Passenger cars
- Off-highway equipment
- Aftertreatment technology
- Emissions monitoring

Venue

To be confirmed

November 19, 2019 - November 20, 2019

Indianapolis, United States
