

2nd CEE Small-Scale LNG Forum

Although in recent years SSLNG industry has demonstrated great potential, experts agree that it's just gaining momentum and major gas industry companies are now developing and investing in new projects more and more. In the CEE region, LNG offers not only a clean fuel and power solution but also an opportunity to gain independence and leverage. There are three major ways of SSLNG utilization: marine fuel or bunkering, transport fuel, and power generation. The use of SSLNG in all areas poses different challenges as well as offers opportunities. There still remain numerous opportunities for taking full advantage of LNG.

Venue

To be confirmed

September 22, 2020 - September 23, 2020

Warsaw, Poland
