## Hydrogen & Fuel Cell International Forum 2020

Organized by the Smart Grid Observer, the **Hydrogen & Fuel Cell International Forum**, February 26-27, 2020 in San Diego focuses on the latest technology advances, business opportunities, and market drivers behind the move toward a hydrogen-centric future. The Forum brings together key stakeholders, thought leaders and innovators for two days of in-depth information sharing and networking on the cutting edge of hydrogen and fuel cell developments.

### Topics to be addressed include:

- Hydrogen production, storage, transport and use
- Electrolyzers, fuel cells and flow batteries
- Stationary, automotive, mobile, and special markets batteries
- Hydrogen production from renewable energy sources, including electrolysis
- Hydrogen production from wastes and residual biomass
- Hydrogen infrastructure, distribution, filling stations
- Fuel cells technologies and applications
- Thermal and combustion applications
- Powering commercial fuel cell vehicles
- Sustainability of hydrogen energy
- Taking steps toward the hydrogen economy
- Standards, regulatory, and policy considerations
- Large scale fuel cell applications
- Fuel cell electric buses and rail applications
- And more

Nationally and globally, California is a clear leader in the transition toward a hydrogen economy and is on the cutting edge in the adoption of FCVs and hydrogen fueling infrastructure as a means of improving air quality and reducing greenhouse gas emissions. This is a unique opportunity to network with key industry innovators and thought leaders as they discuss the potential of, and progress toward, the hydrogen economy.

## Who will attend?

- Hydrogen generation, storage, and transport companies
- Fuel cell companies
- Automotive companies and OEMs
- Technology innovators and vendors
- Manufacturers and commercial / industrial end-users
- Investors and financial analysts
- Transportation and energy service providers
- System component providers
- Municipalities, government representatives and regulators
- Renewable energy companies
- Gas and electric utilities
- Researchers and academics

## Venue

---

**IQ Smart Center - First Allied Plaza**  
655 W Broadway

 February 26, 2020 - February 27, 2020

 San Diego, United States
