

European Fuels Markets & Refining Strategy Conference 2020 - postponed

*****Event has been postponed, new dates under examination*****

Sustainable Refining in The Energy Transition Context

The possible plateauing of oil demand by 2030, the growing electrification of transport, new energy carriers, and the deployment of smart technologies to better manage supply and demand will require business models throughout the energy industry to evolve fast.

Already on the 4th edition of a successful series, ACI's is pleased to announce the 2020 European Fuels Markets & Refining Strategy Conference. The event will bring together senior executives and experts from the refining industry, policy makers, consultants, technology innovators and leading market analysts to discuss the latest challenges and developments within the industry.

The two day event will give you an insight to the industry's latest regulations impacting on refining sustainability, global transition in energy trends & future forecasts on fuel demand, export & trading activities and main challenges for the transport sectors. In depth insights into the European `Vison 2020 - 2050`, MARPOL regulation & impact of Electric Vehicles will provide a solid background for the two days discussion on best solutions for Oil refining industry in Europe aiming for a low Green House Gas economy.
