## Oil&nonOil - S&TC 2020

Oil&nonoil-S&TC, this year being held for the fifteenth time, continues to consolidate its role as Italy's only event for all players in the liquid and gas fuel distribution industry, from depot to vehicle tank.

It is an event that, over the years, has mirrored the technological and organisational transformation of this sector, and served as an opportunity to reflect upon, and weigh up, regulatory changes and commercial and marketing strategies. More than anything, Oil&nonoil-S&TC, year after year, has provided snapshots of the gradual growth of the network of independent fuel distribution operators.
