

## World LNG Forum Online 2020

World LNG Forum Online is a global online networking forum dedicated to the LNG industry. The online forum is designed to provide the latest updates and often (considering the current situation) critical updates from the experts of this industry as well as to provide the much-needed networking possibilities to find the necessary service providers, manufacturers, suppliers or consultants.

With the staggering number of experts joining from Terminal / EPC / End-User / Shipowner companies the World LNG Forum Online is considered by many as the key platform for the whole LNG industry.
