

Biogas USA 2020 Conference

Continuing the high standards of the Wisdom portfolio of global events, The Biogas USA 2020 Conference will welcome RNG and biogas industry experts, and decision-makers from all across the USA to share, learn and collaborate on the latest innovations, strategic approaches, actionable legislation, and future trends in the industry.

This event will offer you the opportunity to network with key RNG stakeholders ranging from feedstock owners, project developers, energy producers, CNG fleet owners and operators, investors, utilities, and municipalities. The unique combination of all the key players in the same room and at the same time allows for candid and productive dialogue where participants discuss best practices, experiences, what's working, and, more importantly, what's not.

All PetrolPlaza members can have 10% off the delegate participation fee using the code: BiogasPetrolPlaza10
