Virtual Asset Management, Automation & Cyber Security Event (AMACS 2020)

The Virtual Asset Management, Automation & Cyber Security Event (AMACS 2020) is a must-attend online summit for all industry professionals, with technical webinars and industry technical panel discussions - all hosted live on virtual platform. This event will gather the technical experts to discuss the latest technology related to Asset Management, Automation and Industrial Cyber Security for various Industries and to network with key industry peers. It will enhance communication and help in exchanging knowledge between the major stakeholders.

The event will also be running Q&A sessions to enable audience participation, and facilitating networking and business engagement opportunities over the course of 3 days. Not only will you be able to get enlightened by our full line-up of speakers - but you'll be able to log-in remotely and join us from anywhere in the world.
