

Sustainable Transport Europe 2024

The European hub for sustainable heavy-duty transport leaders - where innovation meets action

The European hub for sustainable heavy-duty transport leaders - where innovation meets action

Heavy-duty vehicles (HDVs) may be only 2% of the road fleet, but they pack a punch, contributing to 27% of climate emissions in European road transport. Pioneering a path towards climate neutrality, the European Commission's proposed revisions on CO2 emission standards set a crucial deadline of 2030. Adding urgency to the agenda, hauliers' customers are aligning their trajectory with net-zero targets for Scope 3 emissions by 2025. This dual commitment signals a paradigm shift in the heavy transport industry, urging stakeholders to not only comply with evolving standards but to actively contribute to a greener and more sustainable future.

Reuters Events: Sustainable Transport 2024 is the only event uniting Transport & Logistics, Private Fleet Owners, Shippers, Government, OEM Manufacturers, Policy Makers, Utilities, Technology and Finance to accelerate decarbonization in Europe's road freight.

Be at the forefront of sustainable transport and join 400+ transport leaders this September in Amsterdam.

Venue

Novotel Amsterdam City
Europaboulevard 10, 1083 AD

 September 3, 2024 - September 4, 2024

 Amsterdam, Netherlands
