Global Petroleum Data Management Forum

Mon Bien events is organizing this tailor-made forum with a focus on what is needed for scalable multi-channel, bringing together the best minds from the top companies, to allow participants to increase their understanding, the ins and out of the whole process.

Key Practical Learning Points of the Forum:

- IBM - Meaning of digital reinvention and consequences out of it for the players and the industry, Impact of new Digital Technologies on Petroleum
- DNV GL - Data analytics for external corrosion prediction of underground pipelines
- TechnipFMC - Subsea Field Data for Condition and Performance Monitoring
- CGG - Automating the integration of geoscience data as an enabler to analytics and advanced processing.
- Energistics - Managing Data Through the E&P Life Cycle
