

Petrol PLAZA

LPG Cambodia 2018

Cambodia is brimming with growth opportunities in the LPG market with its annual growth in consumption of 7-10%. Spurred by its strong economic growth over the last 5 years that World Bank estimates at 6.9% in 2017, Cambodia is expected to continue this trend for years to come.

With only 10% of its over 16 million population making the switch over to LPG, and the current unprecedented low prices of LPG, more household consumers are expected to convert to LPG from traditional fuels for cooking.

Besides domestic usage of LPG, Cambodia also has a sizable Autogas market. With the ongoing economic boom, demand for fuels is growing rapidly in Cambodia. According to government estimates, vehicle growth in Cambodia stands at more than 10% per annum for the past 3 years.

Don't miss your chance in capturing this emerging market. Join us at LPG Cambodia 2018 from the 13 - 15 November 2018 at the Sokha Hotel in Phnom Penh.
