

## Gas Stations Build Middle East 2019

Annual gathering of CEOs in the MENA region, the Gas Stations Build Middle East Summit will discuss design & building considerations, unique projects as well as advanced technologies that can reduce operation cost and optimize energy efficiency. The summit also places emphasis on optimizing user experience via easier payment options and improved forecourt facilities.

The rising demand for fuel in the MENA region have placed a major requirement on the region's fuel operators to up the number of fuel stations significantly. With governments' urging to meet the growing need, operators are already at work to achieve the targets.

The summit will bring together fuel retail operators and key stakeholders under one roof while also inviting international expertise.
