

Total Ghana unveils third solar powered station

Total Petroleum Ghana Ltd. has opened its third solar powered station in Kumasi as part of its commitment to develop solar energy through cutting-edge technology.

The Total Mile 4 service station, the first of its kind in the Ashanti Region, has 50 solar panel installation with about 16.35 kWp of power production. The site includes a convenience shop, forecourt and a lube bay for efficient vehicle servicing.

Speaking on the project, Eric Fanchini, MD, said the installation of the solar system is expected to contribute to the reduction of the site's carbon footprint.

"In addition to the solar station, the company introduced solar kiosks to selected service stations in 2018 to provide easy access to phone charging and wifi connection," said Fanchini.

Total has over 250 service stations in Ghana.
