

DFS partners with EG Group for global wetstock management services

Dover Fueling Solutions (DFS) has been awarded a five-year global contract with EG Group, which operates as Euro Garages in the UK, for the provision of wetstock management services.

Sites within the EG Group global network – including those in Germany, the USA, Australia, France, the Netherlands, Belgium and Italy - will receive real-time monitoring and advanced wetstock investigation services, designed to help businesses lower operational costs and improve profit margins, whilst keeping them legally and environmentally compliant.

EG Group will benefit from fuel loss identification services, determining losses caused by a variety of factors, including leakage, delivery shortages, spillage and evaporation, theft, fraud and meter drift.

The contract engages DFS as EG Group's global wetstock management partner for their current estate, but also for sites and networks they acquire during the term of the contract. EG Group already has a strong presence in the United Kingdom, Germany, France, Belgium, the Netherlands, Italy, the USA and Australia and has grown significantly in recent years.

"Having a third-party monitoring service take care of our wetstock management gives us peace of mind, leaving us safe in the knowledge that even the smallest instances of fuel loss don't go unnoticed. It's a real cost-saving investment for us, with the added benefit of protecting the environment from the detrimental effects of leaks to ground," commented Guy Bickerstaffe, Group Director of Development at EG Group.

By the end of 2018, EG Group operated some 5,000 sites globally, employing more than 25,000 people and generating pro-forma revenues in excess of US\$20 billion.
