

UK: Certas Energy opens new bunker refuelling site for HGV

The site will help meet Scotland's demand for large fuelling infrastructure for heavy good vehicles.

Certas Energy, the UK's leading independent distributor of fuels and lubricants, has recently opened a new bunker refuelling site at the popular 'fechan Truckstop' (Eardley International) in Scotland.

Featuring a high-speed refuelling system, which dispenses fuel at a speed of up to 120 litres per minute, it allows up to three heavy goods vehicles to refuel simultaneously. The new site will also feature advanced data collection technology, fuel monitoring equipment, filtration systems and multi-product dispensers including Road Diesel, Gas Oil and AdBlue.

The refuelling bunker complements the existing facilities at the 'fechan Truckstop', which include a truck-wash, a popular diner, a drivers' rest area, a TV room, shower facilities and free WiFi.

The Ecclefechan site has been developed to meet the needs of a large portion of Scotland's driver network. The convenient location and excellent transport links will allow us to forge stronger relationships with drivers north of the border and continue to expand our coverage across the UK.

Certas Energy is the leading independent distributor of fuels and lubricants in the UK. With a national network of 150 depots, over 900 tankers, more than 800 retail forecourts.
