

Petronas introduces Malaysia's first mobile refuelling service

ROVR provides mobile refuelling services to B2B customers in Malaysia.

Petroliam Nasional Berhad (PETRONAS) keeps Malaysians on the move with ROVR, the first mobile refuelling service offered by PETRONAS Dagangan Berhad (PDB) in the country.

ROVR has been serving commercial customers (B2B) since its pilot in October 2018, and has since delivered over 1 million liters of fuel. ROVR is now ready to cater to more B2B customers nationwide with the introduction of more ROVR trucks.

"ROVR provides a new refuelling experience, and we are excited to have our customers be the first in Malaysia to experience this. We have received positive feedback from our B2B customers and we are ready to cater to more," said Dato' Sri Syed Zainal Abidin, MD/CEO of PDB.

All ROVR trucks are equipped with sensors to monitor vital information and maintain operational safety throughout the duration of service, at all times.

ROVR's current fleet includes a 4,000-liter capacity and three 11,000-liter capacity trucks for commercial customers.
