

UK: WEX Europe Services partners with Pendragon Vehicle Management

Pendragon Vehicle Management customers will enjoy free Esso Card and discounted rates on fuels at almost 1,300 Esso-branded stations in the country.

Provider of the Esso Card portfolio, WEX Europe Services, has announced its new partnership agreement with the leasing division of Pendragon PLC; Pendragon Vehicle Management.

With Esso Card accepted at over 3,450 filling sites in the UK, the e-route station finder from WEX Europe Services means that Pendragon Vehicle Management customers can optimise journey times and reduce downtime spent looking for places to refuel. WEX Europe Services additionally offers a dual fuel card solution, which allows customers to access an even wider UK filling station network of up to 5,550 sites.

“We want to further develop our value-added services by expanding our fuel card offering. WEX Europe Services are the ideal partner to help us realise this goal, thanks to the extensive Esso Card network and discounted rates they have agreed to offer our customers,” states Neal Francis, Divisional Managing Director at Pendragon Vehicle Management.

The new deal also brings additional fleet management services from WEX Europe Services to Pendragon Vehicle Management customers. For example, Esso Card users have access to an online fleet management tool Velocity, where customers can manage multiple fuel cards at the same time. With instant reporting available, fleet managers gain full visibility of fuel expenditure in one convenient desktop or smartphone app. In addition, all invoices can be managed from one convenient place, simplifying month-end accounting.
