

CyberFuels launches new fuel formulas in Florida

The company is offering specially formulated EcoFlex 91 and 93 Octane GEM fuels at new sites in Florida.

EncounterCare Solutions announced that its subsidiary CyberFuels Inc. is now offering its specially formulated EcoFlex 91 and 93 octane GEM fuels in Daytona Beach and Flagler Beach, Florida. EcoFlex 91 and 93 Octanes are powered by the company's patent pending fuel additives.

EcoFlex, qualified as a GEM (gas, ethanol and methanol) fuel, would reduce greenhouse gases by 10%, and sulfur emissions by 10% , according to the company.

President of CyberFuels, Ronald W. Mills states that the company's two new stations have provided an amazing opportunity to introduce their brands to the general public and showcase their family of Eco friendly products.

"We expect to add our proprietary 87 Octane methanol blended flexfuel to the product line in September", announced Mills.

CyberFuels expects to have continued rapid growth in revenue and profits for the foreseeable future.
