

Neste opens an office in Shanghai, China

Finnish oil company and renewable fuel producer will start sourcing raw materials from China.

Neste opens an office in Shanghai and starts renewable raw material sourcing operations in China.

“Neste is the 3rd most sustainable company in the world and the largest producer of renewable diesel. We are happy to open a new office in China, and start purchasing waste and residue raw materials for the production of our renewable diesel, jet fuel as well as other renewable solutions globally”, says Jennifer Jiang, General Manager of Neste Shanghai office.

Neste will purchase renewable waste and residue raw materials from local collectors in the East coast of China, especially in the regions around Shanghai, but later on also in other big cities.

Neste has renewable diesel production facilities in Singapore, the Netherlands and Finland. The company’s renewable products production capacity is today close to 3 million tons of renewable diesel and other renewable fuels.

The Shanghai office is registered as a fully-owned subsidiary of Neste, which is located at Jing’an Kerry Centre in Shanghai.
