

DFS announces collaboration with ChargePoint

The collaboration will add DC fast chargers, Level 2 (L2) AC chargers and fleet chargers to DFS' product portfolio in North America.

Dover Fueling Solutions has announced an agreement with ChargePoint to bring electric vehicle (EV) chargers to retail and commercial locations in North America. The collaboration will add DC fast chargers, Level 2 (L2) AC chargers and fleet chargers to DFS' product portfolio in North America.

ChargePoint is the world's largest EV charging network, having recently announced that it has surpassed 100,000 places to charge across its global network.

DFS' hopes to unite its experience in the retail fueling industry to ChargePoint's expertise in EV charging to push in the North American market.

"As the transition to electric mobility continues to accelerate, partnerships with companies like DFS are key to expanding access to charging and enabling businesses across industries to be part of the build out of the future fueling network," said Scott Miller, Vice President of Global Sales Operations and Channel, ChargePoint.

"We are thrilled to work alongside ChargePoint to present our North American customers the option to add electric charging stations to their forecourts," noted DFS Vice President and General Manager of North America, Kendra Keller.
