

Wolftank-Adisa expands to Colombia with Fiberglass Tank reparations

Wolftank-Adisa intends to extend its footprint in South America by founding a subsidiary in Brasil.

Wolftank-Adisa, a globally operating corporation in the field of the pollution remediation and the preventive monitoring of tanks in tank farms and retail station, extends its business activities to Colombia with Fiberglass tank reparation. Fiberglass tank repair includes the reparation of cracks, the strengthening of the mechanical structure often subject of softening and aging as well as the protection of the tanks against aggressive fuels.

“Our technologies can be installed without interruption the site activity and have been immediately accepted by local retailers who have huge problems with fuel loss, pollution and business interruptions” states Matteo Ciarapica, Sales and Marketing Manager.

Wolftank-Adisa got recently listed at the Stock Exchange and intends to extend its footprint by founding a subsidiary in Brasil, its first subsidiary in South America. Together with the introduction to new products such as Fiberglass tank sealing, this is considered as another important step of the Group in its global expansion focusing with environmental protective technologies getting more and more in the focus due to the increasing ecological awareness.
