

Tamoil opens unmanned gas station in Huijbergen

Tamoil has been active in the Dutch fuel market for more than 50 years and operates 211 petrol stations in the Netherlands.

Tamoil has opened a new petrol station in Huijbergen. The fuel retailer strengthens its presence in the west of Noord-Brabant.

"Our ambition is to further expand the number of filling stations in the coming years," says Ronald Kempen, Managing Director of Tamoil Netherlands. "With the opening of this new unmanned filling station, it is now also possible for consumers in Huijbergen to fill up with high quality fuel at a competitive price."

Tamoil will celebrate the opening of its newest petrol station with an opening campaign. Customers will benefit from discounts of up to 20 cents per litre on fuels until 31 October.
