

Another successful edition of forecourtech takes place

Major forecourt operators and global solution providers came together at forecourtech '19, a two-day, technology focused event that took place in Alicante, Spain on October 14 and 15.

Last month forecourtech '19 closed the doors on another successful conference & meetings convention. Organisers SAB Events Europe have received very positive feedback and commitment from delegates wishing to attend again in 2020. Social media platforms such as twitter and LinkedIn have been full of compliments and support and the event is creating more and more awareness through the best possible form of promotion, word of mouth, amongst our delegates and their peers within the industry.

The level of support for forecourtech is rising year on year as forecourt operators focus on those technologies that optimise the running of the forecourt and enhance the customer experience. They see that forecourtech is the only industry event focussed on the technologies of today and those that will drive the smart retail forecourt of the future. Over two days delegates at forecourtech heard from

informed industry speakers and take part in a pre-scheduled meetings program with technology providers of choice.

forecourtttech will take place again at the Asia Gardens Hotel in Alicante, Spain on the 5th & 6th October 2020 and the forecourtttech website is already open for registrations at

www.forecourtttech.com
