ENOC Group opens two new sites in UAE

As the company achieved its aim to launch 10 service stations in UAE in 2019, the launch of two new service stations expands ENOC's network to 135 stations across the UAE.

ENOC Group has announced the opening of two service stations in the UAE at Dubai Hills and Lehabab First.

The new stations are equipped with PV solar panels on the roof the canopy, Vapour Recovery System, fuel dispensers and integrated digital wall displays. With these two stations, ENOC's network now includes 18 solar powered service stations and 23 service stations with smart displays.

The service stations have been built as per global retail standards and are complaint with Dubai Municipality Green Building Regulations. The PV solar panels can generate upto 150 Kwh of energy and will transmit the excess energy to DEWA's main grid.

The Dubai Hills service station will serve the communities in Hadaeq Sheikh Mohammed Bin Rashid as the station will have Prowash with one automatic and two manual car-wash bays and AutoPro, a provider of professional automotive services, with three bays for mechanical services, and eight smart fuel dispensers.

The service station located in Lehbab First will help the communities in Lehbab as it is equipped with six smart fuel dispensers, three bays for automotive services, a mosque and a wide space for restaurants.

Both the service stations also have ZOOM, the award-winning c-store owned by ENOC, that provides food and beverages.

“Our goal is to expand our network to 191 service stations in the lead up to Expo 2020 Dubai, which will significantly add to the ease of customers to access their fuel and convenience- store requirements,” said Saif Humaid Al Falasi, Group CEO, ENOC.
