With more than 30 years of experience in the energy sector, ICASA has become a major player with its total and integrated cloud solution for the management of all downstream activities.

'The ICT sector is ever-evolving, and with the ICASA Energy Software Suite with HOS/BOS functionality we stay closely on track of these developments', Rudi Bollen - CEO of ICASA - explains. 'As the fuel retail market and the needs of the customers evolve, ICASA is constantly adjusting and enhancing its ICASA Energy Suite. Tomorrow's Energy Management, Today with ICASA.'

Worldwide partnerships

From the headquarters in Belgium and the different branch offices, ICASA fully focuses on providing its software suite worldwide. In the context of this further internationalization, ICASA has already established several partnerships with multiple forecourt suppliers and downstream consulting firms in different countries.

Ambitious team

‘As ICASA continues to grow geographically and to develop and improve services and solutions, we are constantly looking for enthusiastic people with technical skills’, Rudi continues. ‘Would you like to be part of our ambitious team? At ICASA customer and employee satisfaction go hand in hand. The dynamics that we radiate and the growth we achieve year after year, is largely due to the motivation and expertise of our employees. As a close team, we try to meet the individual needs of our customers and focus on a long-term relationship. We value our customers as partners throughout our journey and evolution from cloud suite to Mobility as a Service (MaaS) and Energy as a Service (EaaS), in a world using new digital technologies such as artificial intelligence (AI), Internet of Things (IoT),’

Practically

Do you want to be part of our international journey? We are currently looking for an ambitious International Business Development Consultant, Software Developers, Implementation Consultants and Technical Application Engineers. Get in touch via jobs@icasa-group.com and convince us of your personality and technical skills.
